Diana Johnson  
Insect-O-Cutor  
1641 Lewis Way  
Stone Mountain, Georgia 30083

Dear Ms. Johnson:

I would like to tell you how successful your Model 389 DGS Insect-O-Cutor has been for us at the City of Warren Waste Water Treatment Plant. We are using them in our Filter Building. In the past we have used the smaller unit. Since the installation of your unit, we have reduced our insect population by approximately 60%. With the installation of four more units we, no doubt, will reduce this even further.

The units are well built, easy to install and easy to clean. I think they are the best unit available anywhere.

Best Regards,

Dennis T. Kennedy, Electrician  
Division of Waste Water Treatment
